Interactive Donor Health History Solution

The screenshot displays the 'Interview Summary' for a donor named Ryan Arndt. The interface is titled 'Gift of Life Donor Center' and includes a 'Self Administered' status. Key information includes Donor ID: 100000104, Gender: M, Visit Date: 06/02/08, Collection Type: 002, Location: W231, Questionnaire Type: 001, and Language: ENG. The summary is divided into sections: Interview Status (Overall: Success and Complete), Questionnaire Status (002), Physical Exam Status (001), Interview Completion (Forming the Complete Status will show only the errors present), and Questionnaire Details (a table of 10 questions with response status and elapsed time). Below this is the Physical Exam Details section and an Interview Evaluation section.

Features to Help You

Improve Safety | Reduce Errors and Omissions
Enhance Donor Experience

Donor Doc™ Features & Benefits

- **Designed to enhance safety while increasing efficiency and productivity**
- **Helps Reduce Incomplete Questionnaires -** Prohibits skipped questions and requires completion of follow-up questions before donation
- **Paperless Process -** May eliminate the need for manual entry or maintenance of paper records, thus providing savings in time and cost
- **Stores All Data Electronically Online -** For easy retrieval, whether collected onsite or during blood drives, including digital signatures and donor photographs
- **Helps Minimize Discarded Product -** By streamlining the review process and helping to control incomplete questionnaires and insufficient tracking of further questioning and follow-up

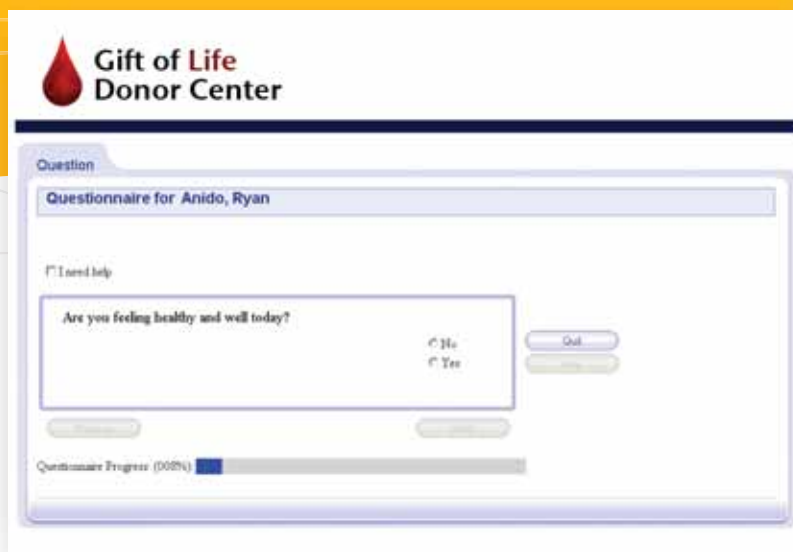

Donor Doc™ Technical Platform

MS Windows or Oracle RDBMS

Compatibility with standard third-party database tools

Centralized deployment and upgrade administration

Database model provided and documented

Helps you cater to donors' individual preferences

- **Encourages Donor Self-Screening** - And allows donors to proceed through the health history process at a personalized pace on standard PC, tablet PC or touch screen
- **Uses Digital-Age Options** - Such as intuitive screens, audio and text in multiple languages and graphics to help facilitate donors' understanding of questions

Donor Doc™ is fully configurable

- **Maintains Multiple Questionnaires** - For different types of donations, such as regular, abbreviated and autologous donation screening, to track donor interview history as well as physical exam and pre-donation test results
- **Easy to Maintain** - Customize questions and questionnaires. Includes Automatic Version Tracking and incorporation of site specific logos and graphics

Interfaces with blood management systems

- **Table-Driven Flexibility** - To access critical information originating from the host donor management system
- **Supports Standards and Regulations** - Including the AABB's Uniform Donor History Questionnaire standards

Our team embraces a company-wide Service 360[®] commitment to provide you with well-developed products, comprehensive education and professional resources, to enable you to utilize your products to their fullest. Our customer support analysts are always available to serve you.
